## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed October 25, 2007 have been fully considered but they are not persuasive.

The claims have been amended to incorporate new matter (explained below). There is no support for the device including two separate distinct registering means as claimed. As recognized by applicant the passages of page 15, lines 7-9 and page 16, lines 15-17 refer to "the entire management computer 11" performing the registering. There is no disclosure of the device comprising separate first and second register means. Where are the first and second means shown in the drawings? Applicant also refers to claim 4 as support for the amendment. However, original claim 4 was directed to a single registering unit for registering a reagent. The specification at paragraph 0049 states the entire computer system 11 performs such function. The registering unit of claim 4 is the same element as the entire computer system 11.

Applicant previously stated the entire computer management system 11 is the same element of those means of claims 3, 5, and 7-10 (see applicant's remarks 12/19/06; page 9). As such, it is asserted the claims referenced above do not add in further structure to that recited in claim 1, but yet recite additional functions or intended use of the control separation means (entire computer management system 11, as previously interpreted as such). A device which discloses a computer system capable of being programmed to operate as such would meet the limitations of the claims.

In light of the amendment, the prior art rejection of Mimura is hereby withdrawn. However, if the new matter were deleted the rejection would be applicable for the examiner asserts that applicant's computer management system 11 performs numerous functions that applicant attribute to other means that correspond to the same management system 11.

***Specification***

2. The amendment filed October 25, 2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: see Response to Arguments and 112 Rejection.

Applicant is required to cancel the new matter in the reply to this Office Action.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 5-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had

possession of the claimed invention. The specification fails disclose first and second register means as claimed.

As stated above the registering is accomplished by the entire management computer system 11. There is no support for the system 11 comprising first and second register means as claimed. The specification discloses:

[0049] In step 407, the entire management computer 11 of the automatic analyzing system registers the analyzing module 5 as an analyzing module necessary for exchange the reagent.

[0053] In step 412, the entire management computer 11 registers the analyzing module 5 again as an analyzing module which has completed the exchange of the reagent.

The matter should be canceled from the claims and specification.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
